

## FFM Christian School

Greetings.

Private school used to be a luxury in the United States. In our world today it has turned into a necessary part of life. We call our school a life saver for children. Many schools are set up to make money and work as a business. FFM Christian School is set up as a non-profit organization that our local church saw as a mission for ministry for the children in our neighborhood. Tuition goes to paying our overhead and cost of operations. We live on contributions and scholarship funds.

As we have become familiar with our public school system, we have found the deception that is being used to convert your children into a worldly philosophy of life that does not include what we see as Biblical values that support a healthy family. They are using tactics that undermine the minds and values of students as leading them to worship government as their savior, self as their god, and parents as their adversary. If parents are content in leaving the moral, spiritual and educational values to a government institution that wants to control every aspect of your family's life, then you must also be aware of the consequences that this produces. Some are rebellion against parents, sex changes, drug abuse, suicide, and loss of any moral structure.

The ACE school program that we use was started by a Christian family over 50 years ago that saw a need to put faith and morals backed by solid Christian values found in the scripture. The ACE program is used in over sixty countries around the world. They work as one organization that meets yearly together to bring the children together to share their growth and knowledge. Our system goes from kindergarten to two years of college. Any ACE student can go to any college that they wish as our program is known for preparing students in knowledge and life values.

Please visit our school as we would like to go into detail with what we believe to be a life saver.
